

The Sunshine Vitamin *in just one drop!*

Carlson Ddrops®

Pure, natural liquid vitamin D₃ simply drops onto your food or tongue. **Carlson Ddrops** is highly concentrated: receive 400 IU, 1000 IU, or 2000 IU in *ONLY* 1 drop! These tasteless drops offer a convenient way to experience the healthy benefits of vitamin D.

Researchers continue to investigate vitamin D for its important role in promoting calcium absorption. Higher concentrations of vitamin D in the blood have been associated with strong bones and good health. Vitamin D has more functions and health benefits than formerly realized. This amazing vitamin supports healthy immune system function, supports a healthy mood and promotes muscle strength. Yet sadly, many people are not getting an adequate amount of this essential nutrient.

When outside, many Americans cover up most of their skin surface with clothing and sunscreen. Avoiding the sunlight prevents our bodies from making natural vitamin D. **Carlson Ddrops** is a convenient way to ensure you receive the vitamin D your body needs.
