Carlson Introduces Ginger ALL™ – with Superior Absorption

Arlington Heights, Ill. (March 29, 2018) – Ginger has been widely used since ancient times for its digestive effects, and we still use it today to help maintain healthy gut flora, aid in digestion, and soothe the digestive tract.* But modern research shows ginger also holds many other health benefits. Scientific studies have demonstrated that ginger can help promote cardiovascular, metabolic, and joint health and provides relief from occasional motion sickness.* Carlson Ginger ALL™, produced with Gingevertm, is a concentrated, high-potency extract that provides a clinically relevant dose of ginger in one small soft gel.

Ginger ALL™ uses supercritical CO₂ extraction technology to concentrate the active compounds from ginger without the use of harsh solvents and little environmental impact. The low temperature of the process helps ensure the compounds in ginger are extracted without damaging or denaturing the product, resulting in an extremely rich source of ginger's polyphenols in a composition that's closest to that found naturally.

The active compounds in ginger are gingerols, shogaols, zingerone, and volatile oils. Ginger ALL™ high-potency ginger contains 30% bioactives and a minimum of 25% gingerols in a single, concentrated soft gel. Just one Carlson Ginger ALL™ 80 mg soft gel provides a similar dose as two capsules of ginger root powder. Ginger ALL™ is non-GMO and allergen-free.

About Carlson Labs

Carlson began in 1965 with a single, natural-source vitamin E formula in Founder Susan Carlson's small Chicago apartment and quickly grew to offer the most complete line of natural vitamin E supplements in the world. In the early 1980s, Carlson helped launch the omega-3 market in North America, importing their first high-quality, great-tasting, sustainable fish oils from Norway. In 2009, they released a new marine oil sourced from an abundant species of calamari. Today, the next generation of Carlson leads the company and the innovations continue. Carlson now offers more than 200 products designed with your family's unique nutritional needs in mind. For more information, call (888) 234-5656, email info@carlsonlabs.com, or check out their website at www.carlsonlabs.com. Carlson is located at 600 W. University Dr., Arlington Heights, IL 60004.
